

Satoshi Okamoto is a professor of the Institute of Multidisciplinary Research for Advanced Materials (IMRAM), Tohoku University, and concurrently a guest senior researcher of the National Institute for Materials Science (NIMS) in Japan. He received a Ph.D. degree from Tohoku University in 1997. Currently, he serves as an AdCom member of the IEEE Magnetic Society and as Editor-in-Chief of the Journal of the Magnetic Society of Japan. His research activities are mainly on the practical magnetic materials and their magnetization processes, which determine the device performance. Recently, he focused on high-performance soft magnetic materials and devices for power electronics applications. He is the project leader of the Innovative Power Electronics Technologies (INNOPEL) project and the International Joint R&D project of Post-Electromagnetic Steel for High-Frequency Applications, funded by NEDO.
